Foreword

Population Census is indeed the only recognized and reliable data source in Bangladesh on size, spatial distribution and all basic characteristics of population from national level down to village level. Bangladesh Bureau of Statistics (BBS) had conducted the fifth Population and Housing Census 2011 during the period of March 15-19, 2011 starting at the zero hour of 15 March, 2011. The publication of community reports for each zila is undertaken on the basis of census results to meet the demand of community level data and information for local level planning and policy making. Naogaon Zila Community Report is one of the 64 Community Reports of the country.

The census results for each upazila by union, ward, mahalla, mauza and village are furnished in the community report of Naogaon Zila in order to facilitate the users at various levels. Two sections of the report namely, "At a Glance" and an "Analytical Findings" will be of special advantage to the users. I believe that the data presented in this report will provide a benchmark database to policy makers, planners, researchers, administrators, development partners and other agencies for formulating and implementing their plans and programs for overall development. I also believe that this report will be helpful for all users both at home and abroad.

I deeply acknowledge the active participation and commendable cooperation of all the government and non-government organizations, district and field administration, different local government bodies, print and electronic media of the country for making the Census possible. I also express my gratitude to the European Union (EU), US Census Bureau, U.S. Agency for International Development (USAID) and United Nations Population Fund (UNFPA) for their financial and technical assistance for completing this colossal task. I express my heartfelt gratitude to AHM Mustafa Kamal, FCA, MP, Honorable Minister, Ministry of Planning for his effective guidance and significant cooperation throughout the Census operation. We are also grateful to the respected Cabinet Secretary and the Senior Secretary, Ministry of Public Administration for their active cooperation.

The Population and Housing Census 2011 had made best use of the modern IT technology. In order to minimize time and manpower, modern technology like ICR (Intelligent Character Recognition) machines and iCADE (Integrated Computer Assisted Data Entry) system were used in capturing the census data. CSPro software was used in analyzing and processing of data. It may be mentioned that the census preliminary report has been published within 4 months of data collection and census data for the whole country up to mauza/village level and disseminated through BBS website within 15 months after the enumeration. I express my thanks to Director General and Deputy Director General, BBS, Project Director, Population and Housing Census 2011, members of the Editors' Forum, Project Directors' Forum, other officers and staff members of BBS and report writing consultants involved in the efforts and finally bringing out this report in time.

Preface

Bangladesh has a long tradition of conducting the population census on decennial basis since 1872. The fifth population census of Bangladesh and fifteenth in the region, following the decennial periodicity, was conducted during March 15-19, 2011. The main objective of the census was to collect information on the basic characteristics related to housing, households and population for developing a comprehensive database for all development planning and human resource development programmes as well as economic management.

Population and Housing Census 2011 was conducted in three phases. In the First Phase, basic data about all households and individual members of the households were collected through ICR formatted questionnaire during March 15-19, 2011. In the Second Phase, quality and coverage of the main count were verified through a Post Enumeration Check (PEC) survey during April 10-14, 2011. For the first time in the census history of Bangladesh, PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS). In the Third Phase, detailed socio-economic information was collected by administering a long machine readable questionnaire in a sample survey held during October 15-25, 2011.

The preparatory works of the census was started by Bangladesh Bureau of Statistics from mid 2009 with updating maps and area Geo-codes. The preliminary checking on the census questionnaire was done in several times through field operation. The census questionnaire was pre-tested in selected areas with the participation of some experts of the "Technical Committee". The views of the users' and experts' were taken into consideration for finalizing the questionnaire. The census field operation and quality of census inputs were tested under two zonal operations. Accordingly the questionnaire was designed in machine readable format with the technical assistance of US Census Bureau and was printed with the financial assistance of European Union (EU) through the United Nations Population Fund (UNFPA).

The entire country was divided into 2,96,718 Enumeration Areas (EAs) with the help of enumeration area maps in order to ensure full coverage, effective management and close supervision. There was a supervisor for every 6 or 7 enumerators to supervise their works. The Geo-coding system developed in the previous Census was checked, edited and computerized.

Modified Defacto Method was adopted in enumerating the population. Zero hour at the night of 15 March, 2011 was considered as the census moment. On the other hand, the hours between census moment and the following morning (6.00 a.m.) was considered as the census night. Basically the floating people were counted at that night for avoiding omission and duplication.

Census committees were formed at Zila, Upazila, Paurashava, Union/Ward levels to ensure participation of local administration and local bodies. Moreover, supervisors and enumerators were appointed from amongst the local unemployed youths and teachers.

At national level, a standing technical committee comprising of well-known census experts and users of census data was formed to provide technical support to BBS in planning, designing and executing the census. A seminar-cum-expert consultation was held at BBS with the census data users, experts, researches and educationist to get their views for finalizing the census questionnaire and other policy related issues.

A nationwide publicity campaign was carried out before census through posters, banners, leaflets, brochures, features, films, miking, radio, television and newspapers for the purpose of creating public awareness and motivation.

I express my heartfelt gratitude to the Honorable Minister for Planning for his effective guidance and significant cooperation in making the census a success. I express my deepest gratitude to Secretary, Statistics and Informatics Division (SID) for his whole-hearted support and cooperation to the census. Moreover, members of 'Steering Committee', 'Standing Technical Committee', Consultants and also to participants of the Seminar-cum-Expert Consultation for their valuable contributions for finalizing the questionnaire and the census programme. I am thankful to all members of the sub-committees on publicity, sampling and report writing for their valuable contribution. I am also thankful to our mass media, local bodies and the people at all level for their whole-hearted supports to the census.

Finally, I like to thank Deputy Director General, BBS, Project Director, Population and Housing Census 2011 Project, members of the 'Editors' Forum', 'Project Directors' Forum', other officers and staff members of BBS and local consultants who vigorously helped in implementing the census activities and processing the census data with their relentless efforts to make the census a success and bringing out this report within a very shortest possible time.

Physical Features of Naogaon Zila

Background: Naogaon was one of the sub-divisions of former Rajshahi Zila. It was established in 1877 and was up-graded to zila on 1 March, 1984. It is believed that the present zila headquarters initially developed in a mauza comprising of nine (meaning 'Nao' in Bangla) villages (meaning 'Gaon' in Bengali). The zila might have derived its name as Naogaon from the words 'Nao' and 'Gaon'.

Area and Location: The zila is bounded on the north by West Bengal State of India, east by Joypurhat Zila and Bogra Zila, south by Natore Zila and Rajshahi Zila and on the west by Chapai Nawabganj Zila and West Bengal State of India. It lies between 24°32' and 25°13' north latitudes and between 89°23' and 89°10' east longitudes. The total area of the zila is 3435.65 sq.km. (1326.00 sq.miles) of which 9.09 sq.km. (3.51) sq. miles) is reverine and 19.45 sq.km (7.51 sq. miles) is under forest.

Administration: Naogaon Subdivision, under Rajshahi District, was established in 1877 and was turned into a zila in 1984. The zila consists of 11 upazilas, 99 unions, 2497 mauzas, 2780 villages, 3 paurashavas, 27 wards and 92 mahallas. The upazilas are Naogaon Sadar, Atrai, Badalgachhi, Dhamoirhat, Manda, Mahadebpur, Niamatpur, Patnitala, Porsha, Raninagar and Sapahar.

Township: Naogaon City is situated on the bank of the river Jamuna. It comprises of an area of 37.08 sq. km. Naogaon Municipality (now paurashava) was established in 1963. It consists of 9 wards and 62 mahallas.

Archaeological Heritage and Relics: Among the archaeological heritages, Paharpur Buddhist Vihara, Jagaddal Vihara, Halud Vihara and Agrapuri Vihara are the notable.

Historical Events: Indigo rebellion (1859-62) and peasant revolt against the zamindar in protest of increasing land revenue (1883) are the notable historical events of this zila.

Marks of the War of Liberation: There are 9 Mass graves of the Martyrs, 7 mass killing sites, 1 memorial sculpture and 1 monument which bear the testimony of the War of Liberation in Naogaon Zila.

Famous Personalities: Naogaon is the homeland of many national and international personalities. Among them Late Mohammad Abdul Jalil, the Former Minister of Bangladesh Government, a renowned politician was the son of the soil of Naogaon Zila. Besides, the cultural figure Alomgir Kabir, the leading sportsman Zakaria Pintu and poet Talim Hossain are also the mentionable names in this respect of Naogaon Zila.

Temperature and Rainfall: The annual average temperature of the zila varies maximum 37.8°C to minimum 11.2°C and the average annual rainfall of the zila is recorded 1862 mm.

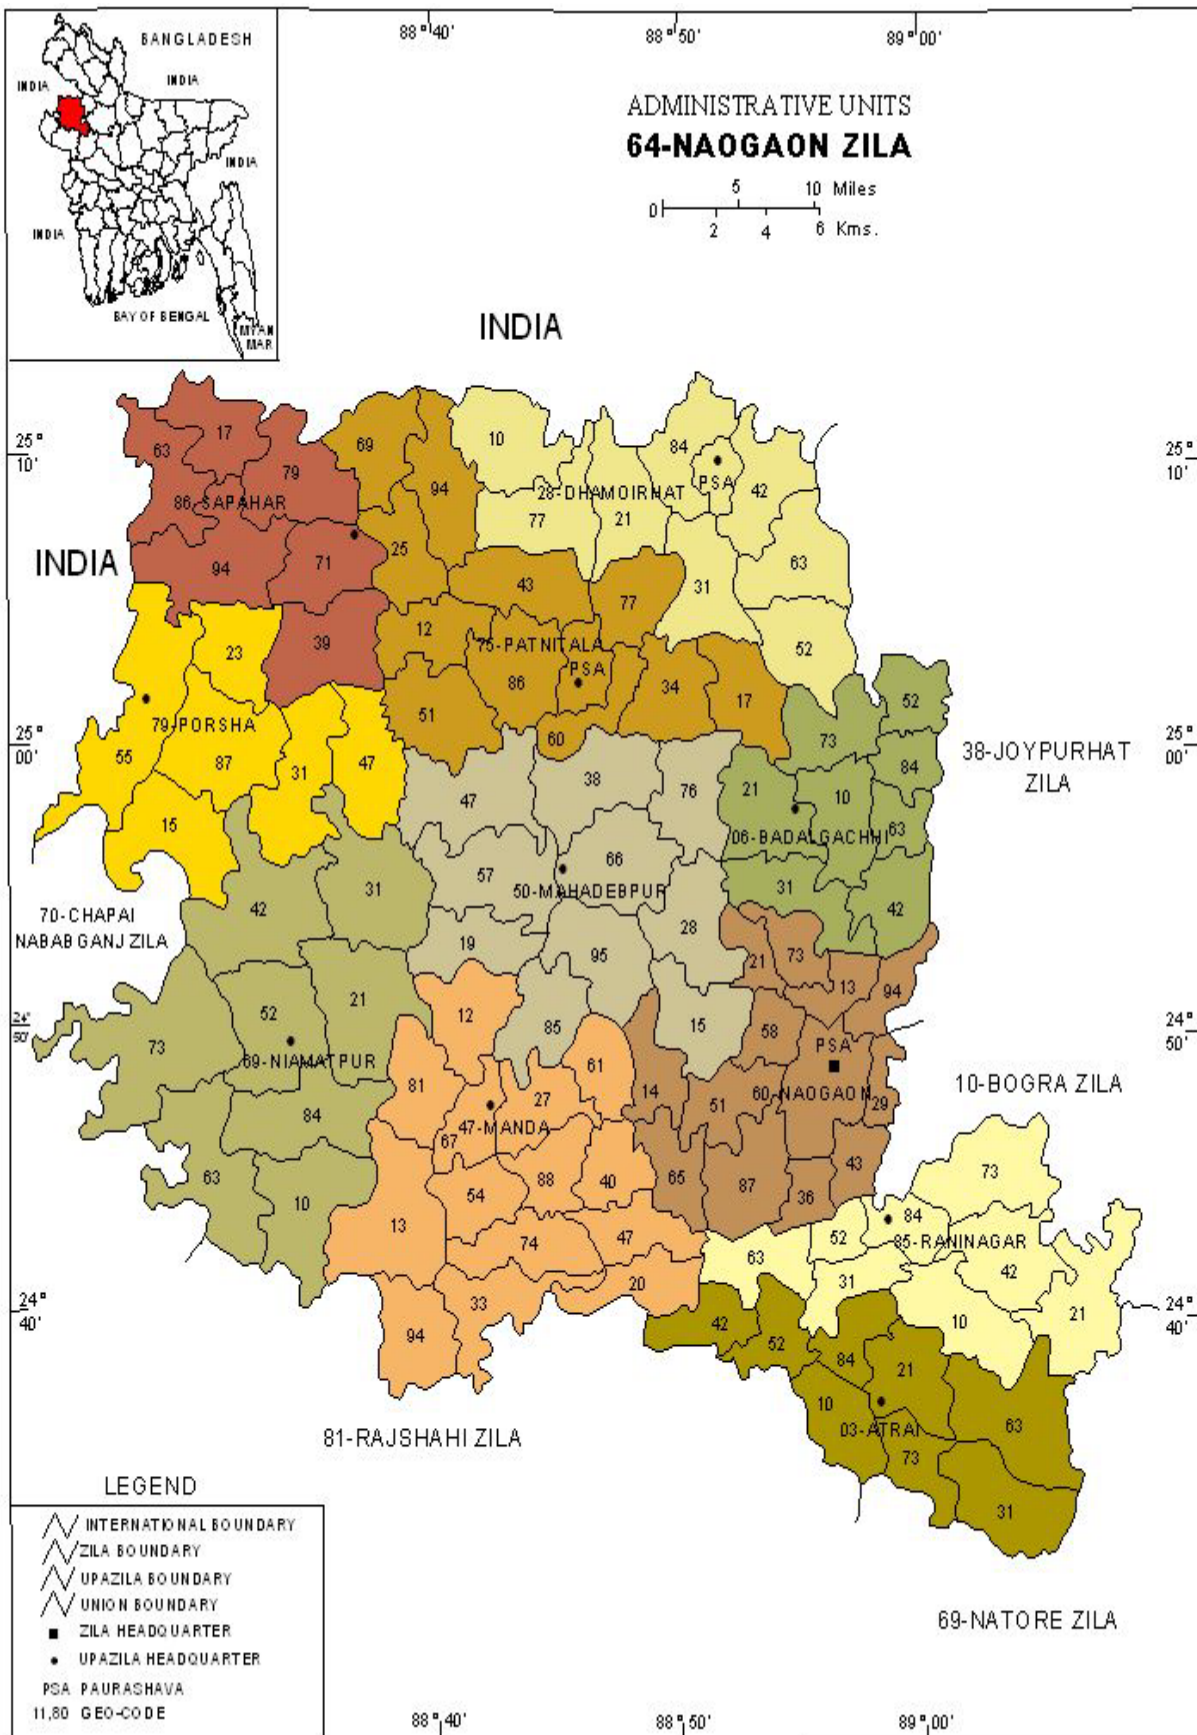

Main Rivers: Atrai, Punarbhaba, Little Jamuna, Nagar, Chiri and Tulsi Ganga are the main rivers of this zila.

Main Crops: The major agricultural products comprise of aus, aman, boro, jute and wheat. Among rice crops, aman covers by far the largest area followed by boro and aus. Rice covers 85.25% of the gross cropped area of this zila. Rabi (summer) includes mustard, khesari, masur, mash, potato, sesame, fram, spices, barley, maize, tobacco, sugarcane, etc. Tal (palms) are abundant in the Barind portion of the zila. Besides, the cultivation of hemp plant (*Cannabis sativa*) is a speciality of the Naogaon Zila. The plant yields three narcotic products called ganja, charas and bhang.

Main Fruits: The homestead flora of Naogaon Zila represents different species of commonly planted trees. These are mango (*Mangifera indica*), jackfruit (*Artocarpus heterophyllus*), black berry (*Syzygium cumini*), betel nut (*Areca catechu*), coconut (*Cocos nucifera*), palm tree (*Borassus flabellifer*), guava (*Psidium guajava*) and lime (*Citrus grandis*).

Transport: Palanquin, horse carriage, bullock cart, the traditional transports found in the rural area of Naogaon Zila, are either extinct or nearly extinct. Now-a-days, all the upazilas are connected with the zila headquarters with metalled roads. Bus, minibus, three wheelers ply over the zila.

CHAPTER – 1

Introductory Notes on Census

1.1 Introduction: The population and housing census is the unique source of reliable and comprehensive data about the size of population and also on major socio-economic & socio-demographic characteristics of the country.

The population and housing census provides information on geographic and administrative distribution of population and household in addition to the demographic and socio-economic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that researchers, administrators, policy makers and development partners can use census data in formulating and implementing various multi-sectorial development programs at the national and community levels.

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban areas and union/mauza/village in rural areas). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance, employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The users will find this report as a valuable reference document for formulating plans and programmes for welfare and well-being of the common people, in particular for the community in general.

1.2 Census and its Periodicity: Bangladesh Bureau of Statistics is the national statistical organization for conducting national census. In 1872, the practice of census was started in this territory. Thereafter, another census was conducted in 1881 and since then the decennial periodicity of census was maintained with the exception of 1971 which was held up and delayed till the year 1974 because of the Liberation War. The 1974 census was the first census in Bangladesh after her emergence as an independent country in 1971. Bangladesh went back to the decennial periodicity and conducted the second, third, and fourth censuses in 1981, 1991 and 2001 respectively. The Population and housing census of 2011 is the 5th in this census series.

1.3 Objectives: The population census was carried out to achieve the following objectives:

- To conduct the 5th national population and housing census of Bangladesh through count of 100% households and population on specific date of 2011.
- To develop database or benchmark data for local level planning up to village and union level.
- To prepare sampling frame for all censuses and surveys.
- To prepare data for electoral roll of national and local elections;
- To prepare data for fixation of quota and proportionate distribution of resources.
- To prepare data for implementation of development works at the local levels.
- To prepare database for micro-credit and productive employment at the local level.
- To generate data for ensuring education for all through participatory approach.
- To prepare database for assurance of health and nutrition for all through social mobilization.
- To make population projection at the regional level.
- To generate data for preparation of monographs and for monitoring the progress of MDG's such as, alleviation of poverty through accelerated economic growth, generation of productive employment, human resource development, compulsory primary education and assurance of health and nutrition for all by 2015.

1.4 Census Phases: The census data collection was completed in three phases.

Phase I - Main Count: Collection of basic information for all households and individuals using an ICR formatted questionnaire.

Phase II- Post Enumeration Check (PEC): A PEC survey was carried out to measure quality and coverage of the main census count. The survey was conducted immediately after receiving filled-in census questionnaires at Dhaka head office. For the first time in census history of Bangladesh, the

PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS).

Phase III- Sample Census: A sample census (large scale sample survey) was carried out at the last phase. For this undertaking, ICR formatted long questionnaire was adopted to supplement the data of the main census. Being a programme of much wider information coverage, the sample census was carried out with the detailed data relating to population and household characteristics including fertility, mortality, morbidity, migration etc.

1.5 Census Planning: The census preparatory work programme was mounted in the mid of 2009. A census work-plan was prepared defining in details the activities to be performed and completed by specific dates in each calendar year. Field instruction manual and training manual were prepared for census workers of different stages. These manuals provided precise guidelines regarding: (i) duties and responsibilities to be performed at all levels, (ii) lessons to be shared during training of field supervisors and enumerators, (iii) mapping and geo-coding operation, (iv) how questionnaire to be filled-up, (v) enumeration and supervision disciplines to be adhered, (vi) assignment of census workers, (vii) distribution of census materials, (viii) formation of census committees at different levels, and (ix) implementation of publicity activities as per plan.

1.6 Mapping: The updated and well defined map is one of the basic instruments to succeed any population and housing census. The primary objectives of the mapping operation are (i) to update the produced GIS maps and delineate enumeration areas (EA) in the country to facilitate the smooth counting of inhabitants during enumeration and (ii) fundamentally to ascertain that all areas are covered and that everyone in the country is counted with minimal possibility of under or over counting.

Household counting for EA demarcation and concurrent EA mapping activities were carried out in two phases beginning from May, 2009. The first phase, confined exclusively to rural areas, necessitated updating and preparing of union, mauza, and control maps. The second phase was initiated only for urban coverage in view of the complex task associated with household and EA boundary identifications due to quite dense habitations in urban localities. All urban ward, mahalla, and control maps were updated and/or newly prepared showing current boundaries. BBS used GIS Maps for field operation for the first time in census history of Bangladesh. GIS Maps Project of BBS produced the maps from aerial photography. The updated maps were used for zonal operations. All maps were finally checked and updated during zonal operations. The updated EA maps were used for main census, PEC and sample censuses.

1.7 Designing and Pre-testing of Questionnaire: The contents of census questionnaire were determined based on data needs assessed on government current priorities and also recommendations of technical committee and data users. Several preliminary checks of the questionnaire were made locally. Lastly, the questionnaire was pre-tested in selected areas with participation of some experts of the technical committee. Satisfactory pre-test results were resolved in finalising a two module questionnaire for adoption in the census. Accordingly the questionnaire was designed in machine readable format with the technical assistance from US Census Bureau and was printed with the financial assistance from European Union (EU) through United Nations Population Fund (UNFPA).

1.8 Questionnaire: A two module questionnaires was used for the main census. As many as 25 questions were included in it. A total of 11 questions relating to housing and household characteristics were included in household module. The remaining 14 questions focusing on individuals were incorporated in individual module. The items of the questionnaire were identification, address of household, number and structure of house including tenancy, toilet facility, electricity connection, ethnicity, individual age, sex, religion, marital status, literacy, disability, education and working status. All data on the items were collected through door to door visit and interviewing head of the household or responsible member in absence of head of the household.

1.9 Zonal Operation: Two zonal operations were executed in both urban and rural areas. These operations helped in setting up a system germane to: (i) involve local people in the census, (ii) interact with local bodies, and (iii) ensure efficient field work arrangements.

The first zonal operation was held during May-July 2010 in 3 (three) phases. In the first phase, it covered 39 zilas, second phase 17 zilas and third phase 8 zilas. During first zonal operation the following tasks were completed:

- a) Updated of geo-code list;
- b) Updated of Mauza and Mahalla maps with demarcation of EA boundaries;
- c) Prepared the supervisors' sketch maps;
- d) Prepared the primary list of local enumerators and supervisors with names and addresses and
- e) Identified the depopulated Mauzas and Mahallas.

Besides, Zonal Officers introduced themselves to the public representatives of different local bodies and local administration and sought their support and cooperation in completing census activities successfully. They extended all sorts of cooperation and gave their best effort for the completion of field activities of census in Naogaon.

The second zonal operation was mounted just three months prior to census, i.e. November-December 2010, to conduct the main census in March, 2011. This schedule ensured the smooth flow of census activities including field management system.

The main tasks completed in second zonal operation:

- a) Formed census committees in zilas, upazilas/thanas, wards/unions, paurashavas and city corporations,
- b) Interacted with local bodies,
- c) Verified supervisor maps and getting those finalised,
- d) Finalized the lists of supervisors and enumerators and
- e) Checked and endorsing locations and available facilities of training centres selected to train enumerators and supervisors. All these activities were performed by 2,612 Zonal officers under the supervision of 130 Census zila coordinators who were engaged from BBS and other ministries.

The terrains and habitation patterns of the localities were taken into consideration in forming EAs. mauza/ward maps were used for exact identifications of EAs within mauzas and wards. During census enumeration final base maps and supervisor maps were used by the Zonal Officers, Enumerators and Supervisors for field control and overcoming coverage errors.

1.10 Organization: The lowest unit of census was Enumeration Area (EA). As many as 2,96,718 EAs were delineated all over the country where Naogaon had the total number of 6111 EAs. Above them there were 48,531 Supervisors' Areas (SAs) throughout the country where Naogaon had 863 Supervisors' Areas with every SA comprising of 6-7 EAs. For each EA one enumerator and for each SA one supervisor were appointed temporarily from local educated youths. Females were given priority in selecting enumerators and supervisors. Enumerators and supervisors were controlled by 2,612 Zonal Officers where at Naogaon there were 53 Zones. To supervise the activities of zonal officers, 130 Census zila coordinators deployed from Class-I officers of BBS, SID and Ministry of Public Administration. For census operation Naogaon Zila was divided into two Census zilas, each census zila was supervised by one Census zila coordinator. Each zone was consisted of on an average 100 enumeration areas. The large mauzas/villages were divided into two or more enumeration areas and small mauzas/villages were merged to form an enumeration area consisting of about 120 households, keeping in view the terrain and habitation pattern of the locality. The Project Director of Population and Housing Census Project was the coordinator of field activities and maintained liaison with higher authority and different organizations. The Director General of Bangladesh Bureau of Statistics acted as the Census Commissioner and the National Census

Coordinator. The Secretary of Statistics and Informatics Division was the Chief National Census Co-ordinator who guided the whole census programme and its' implementation.

The local administration and public representatives participated in the census through census committees formed for City Corporations, Paurashavas, Zilas, Upazilas, Wards, and Union Parisads. The Mayors of City Corporations and Paurashavas, Deputy Commissioners, Upazila Chairman, Ward Councillor and Chairman of Union Parishads headed the respective Census Committees with BBS officials being the Member-Secretaries.

Central census control room was established at Dhaka headquarter of BBS (Parishankhyan Bhaban) under active supervision of the Project Director. Similarly, control rooms were established in each administrative levels namely Zila, Upazila and Union. These control rooms functioned round the clock during entire field enumeration period. A number of officials were engaged to provide logistics during census field activities, monitored constantly the census performance, informed the National Census Co-ordinator and Chief National Census Co-ordinator about performance status and obtained their instructions for successful completion of the census.

1.11 Enumeration: The population across the country was counted at a stretch for five days during 15-19 March 2011 using machine readable questionnaires. The counting began at zero hour of 15 March 2011. Floating people were counted from zero-hour till 6.00 am (the night is called census night) at the places where they were found passing the night. In case of households, on the other hand, all members were enumerated in their residences. The modified de-facto method was followed in counting, i.e. every person was counted at the place where he/she stayed in the census night except the people on board and on duty, counted at their residence.

1.12 Data Capturing/Processing: The adoption of Intelligence Character Recognition (ICR) strategy was planned for census data capturing. As such, ICR machines were procured. BBS had gathered experience in OMR and OCR techniques of data capturing from earlier censuses of 1981, 1991 and 2001. The ICR technology was introduced in this census. US Census Bureau supported BBS in using Capture Pro and iCADE (Integrated Computer Assisted Data Entry) system for data capturing. For analyzing and tabulating census data CSPro software was used.

iCADE: Integrated Computer Assisted Data Entry provides digital images of respondent questionnaires. Data were processed through OMR, OCR, KFI, Quality Assurance (QA). Automated tracking system was present at each step in the process.

Steps:

- i) **Batching and Batch Identification:** Filled-in census questionnaires were batched for processing. An identifying batch cover sheet was created. Batch status numbers were kept in the database along with other relevant metadata.
- ii) **Scanning:** Each page from the batched census questionnaires was scanned into a TIFF Image. In each step status info is kept in the database.
- iii) **Auto-registration:** Auto-registration relates images to the Master Template, registration of barcodes of forms, and reading checkboxes. This may be treated as preliminary "mini" OCR process. Auto-registration then creates a script with data, captured so far.
- iv) **Manual Registration:** Images where auto-registration detected positional tolerance errors are sent to an operator who resolves skewing and bar code issues and repairs checkbox ambiguities. The OMR operator examines all checkboxes.
- v) **Batch Completeness/Exception Review:** Batch completeness identifies batches with problems, forms with missing, loose or duplicate pages, batched not scanned, scanned not batched. In Exception Review, the operator verifies each issue (checking paper forms if needed) and takes appropriate action.

- vi) **OCR Review:** Converts designated handwritten and printed text fields to electronic data with more than 99% accuracy for numbers. An operator then reviews OCR results, verifying all 1s, 2s, etc. Any rejected field has to be reprocessed using KFI.
- vii) **Key From Image (KFI):** The OMR portion of the programme captures check box data prior to KFI. KFI technology guides a keying operator to the write-in fields on the form where the system detects presence. Furthermore, a keyer does not take any field already read by the OCR machine. Keyers may also re-register skewed pages or correct checkbox answers.
- viii) **Quality Assurance (QA):** Two samples are drawn, one from the OCR read “universe” and one from the KFI keyed-in “universe”. They are sent to an independent keyer to be rekeyed. OCR and KFI may have different sampling rates and different accept/reject quality rates. These results are then verified against the data captured earlier, and discrepancies are presented and corrected by analysts.
- ix) **Sample Verification, Classification and Adjudication:** A sample of the fields is keyed by an independent verifier. A classifier reviews images and data from OCR/KFI and compares with verifier’s data. An adjudicator determines final truth and decides if the batch is acceptable, and determines the cause of discrepancies, which may be changed against the original keyer.
- x) **Remainder Verifier, Classifier and Adjudicator:** If batch quality for either universe is unacceptable, all remaining fields are rekeyed by a verifier, and results are compared and corrected by a classifier, and adjudicated by a final adjudicator.

All records were subject to an efficient computer edit and imputation programme. The errors and inconsistencies, if detected, were imputed by applying both **hot-deck** and **cold-deck** methods.

1.13 Data Tabulation: Separate files were maintained for all zilas. The census tabulation plan was finalised through technical committees’ recommendations admitted of options for comparing most of the individual cells with 2001 census results. The tabulation programme was developed in CSPro and thoroughly tested before adopting for census tabulation. All tables were transferred to MS Excel/MS Word format for ensuring correct headings and footnotes.

1.14 Publication: The census reports will provide population information at the national, zila and community levels. Besides the Community Reports, Zila Reports, National: Analytical Report, Socio-economic & Demographic Report, Urban Area Report, Union Statistics Report and Administrative Report will be published during the coming months.

1.15 Post Enumeration Check (PEC): To assess coverage of the census an effectively designed Post Enumeration Check (PEC) survey was conducted just a month after completing the census. Bangladesh Institute of Development Studies (BIDS) conducted the PEC survey. The PEC survey data were collected during 10-14 April 2011. The net under coverage rates were estimated separately for national level aggregate and also for rural, urban, other urban (Upazila Headquarters) and City Corporation areas which are given below:

Locality	Net error rate (%)
National	3.97
Rural	3.80
Urban	5.26
Other Urban (UHQ)	4.07
City Corporation	3.86

The PEC Survey Report can be obtained from Bangladesh Institute of Development Studies (BIDS) and also from the online addresses of Bangladesh Bureau of Statistics and BIDS respectively: www.bbs.gov.bd and www.bids.org.bd

CHAPTER -2

Concepts and Definitions

The concepts and definitions adopted in the census and those presented in this report are as follows:

Census Moment: It is the precise time hour fixed for starting nation-wide census enumeration. In the census, the zero hour of 15 March 2011 was treated as the census moment.

Census Night: The time span from census moment of time zero hour to 6:00 a.m. of 15 March 2011 was the census night.

Census Period: It includes the days ascertained to complete the census enumeration activities. In this census, 15-19 March 2011 was considered as the census period.

Reference Period: It is reference time cut off to which particular sets of census data items relate. In this census two reference periods were used. These are:

- i) Field of Economic Activity: One week preceding to census moment (8 to 14 March 2011)
- ii) For other variables: Census night.

Modified De-facto Method: It means the system of enumerating people at places of their residence or where they spent the census night. Adhering to this method, the counting of floating population across the country was completed during census night at places they were found except the people on duty or on board. The remaining vast majority of the people were counted in their usual residence (including people on duty or on board) during 5 (five) days census period. As this is a slight deviation of de-facto method, so it is termed as modified de-facto.

Floating Population: People who were detected passing the census night at railway stations, launch ghats, bus terminals, boats, temples, pagodas, mosques, hotels (boarders), footpaths, under building-stairs, overpass/underpass and some other unusual places were considered as floating population. The people who were fishing at deep sea and hiving in the forest especially in the Sundarbans were also treated as floating population.

Household: Persons, either related or unrelated, living together and taking food from the same cooking pot constitute a household. A single person living and eating alone forms one-person household. Households which are classified into three categories are defined below:

- i) **General (dwelling) Household:** Includes all households having usual dwelling places. In 2001 census it was used as dwelling household.
- ii) **Institutional Household:** Hospitals, clinics, jails, barracks, orphanages, hostels/halls of educational institutions etc. were treated as Institutional Households.
- iii) **Other Household:** Includes those households other than general and institutional found in census night such as messes, shops, offices etc.

Ownership and Tenancy of Dwelling Unit: Tenancy status of dwelling units were classified into the following three classes:

- i) **Owned:** Dwelling unit found occupied and used by household owning it.
- ii) **Rented:** Dwelling unit found occupied and used under arrangement of contractually rented.
- iii) **Rent free:** Dwelling unit found occupied and used without rent.

Literacy: It denotes to the ability of writing a letter in any language. Literacy rate is calculated for population 7 years and over, 15 years and over and also for population of all ages.

Sex Ratio: It is the number of males per 100 females.

Community: It refers to the following geographic, administrative or revenue units:

- i) **Zila:** Zila (Bengali word of District) is a mid-level administrative unit comprising of several upazilas/thanas and having Zila Parishad institution.
- ii) **Upazila:** Upazila (Bengali word of Sub-district) is a rural administrative unit comprising of several unions and having Upazila Parishad institution.
- iii) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having Union Parishad institution.
- iv) **Mauza:** Lowest administrative unit having a separate jurisdiction list number (J.L No) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.
- v) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- vi) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- vii) **Mahalla:** Lowest urban geographic unit.

Urban Area: It corresponds with area developed around a central place having 5000 population with such amenities as metaled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agriculture occupations. City, Town, Paurasava and Cantonment are the examples of urban area.

- i) **Mega City:** It is metropolitan area having population 5 millions or more.
- ii) **City Corporation:** It includes city corporations/incorporated and administered by the Ministry of local government under City Corporation Act, 2009.
- iii) **Paurashava/Municipality Area (PSA):** It includes paurashavas incorporated and administered by local government under Paurashava Act, 2009.
- iv) **City:** It is an urban area having population 1,00,000 and above.
- v) **Other Urban Area (OUA):** It includes those Upazila headquarters which are not paurashavas. The only exception relates to 17 unions adjacent to Dhaka City Corporation under Dhaka Metropolitan Area. These unions are treated as other urban areas on the basis of their urban characteristics.
- vi) **Town:** It is an urban area having population less than 1,00,000 .

Growth Rate: The annual population growth rate has been computed using the annual compounding formula:

$$P_n = P_0(1+r)^t$$

Where,

P_n = The population of 2011 census

P_0 = The population of 2001 census

r = Annual population growth rate

t = Time period between 2011 census to 2001 census

2. General refers to general household in 2011 and dwelling household in 2001.
3. Dash (-) denotes data not available due to non-existence of paurashava.

3.1.1 Background: Atrai Upazila came into existence as a thana in 1916 and was upgraded to upazila in 1984. Nothing is definitely known about the origin of the upazila name. The upazila headquarters is located on the southern bank of the river **Atrai** and it is generally believed that the upazila might have been named **Atrai** after the name of the above river.

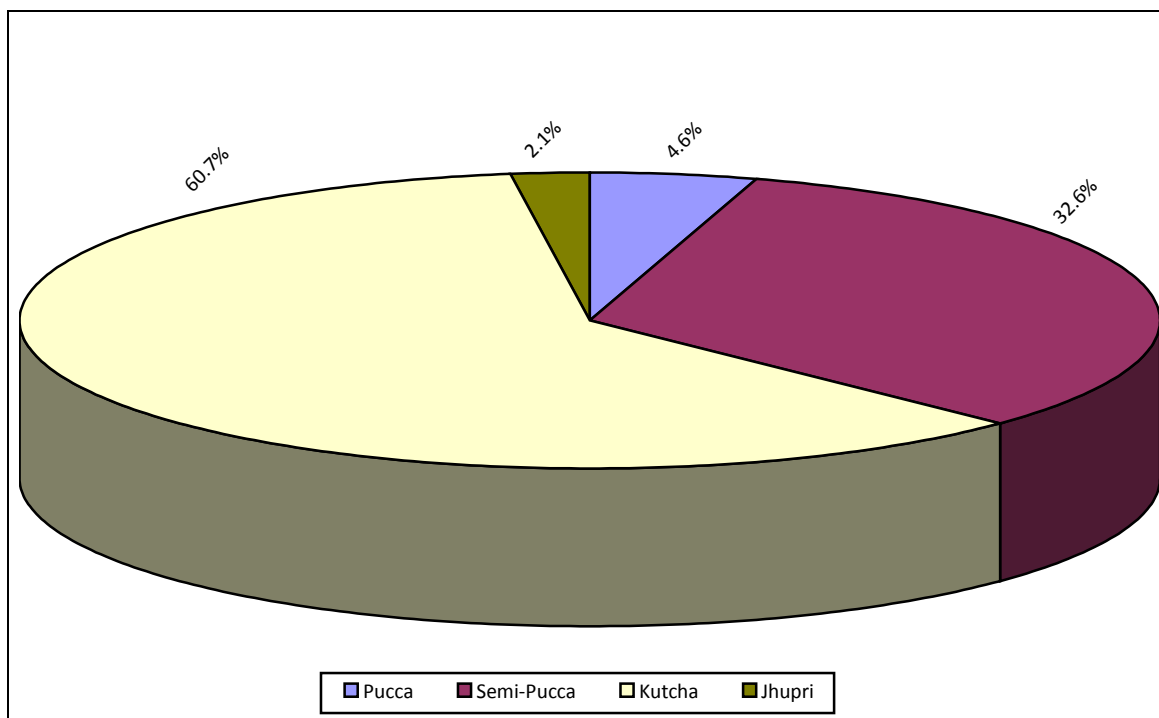

3.1.2 Area and Location: The upazila occupies an area of 284.40 sq.km including 1.51 sq.km rivers. It is located between 24⁰32' and 24⁰42' north latitudes and between 88⁰49' and 89⁰06' east longitudes. The upazila is bounded on the north by Raninagar Upazila and Manda Upazila, east by Singra Upazila of Natore Zila, south by Natore Sadar Upazila and west by Bagmara Upazila of Rajshahi Zila.

3.1.3 Administrative/Geographic Unit: The upazila consists of 8 unions, 145 populated mauzas and 200 villages. The average size of population of each union, mauza and village are 24157, 1333 and 966 respectively.

3.1.4 Housing and Household Characteristics: In the upazila, there are 45465 households. Distribution of household by type shows that there are 99.90% general unit, 0.02% institutional and 0.08% other unit.

- **Household Size:** The average household size (General) for the upazila is 4.2 persons, for rural area the size is also 4.2 and for urban area the size is slightly higher i.e. 4.4.
- **Type of Housing Structure:** In the upazila, 4.6% general household live in pucca house, 32.6% in semi-pucca house, 60.7% in kutcha house and the remaining 2.1% live in jhupri which is shown in a pie-chart in figure 1.1.

Figure 1.1: Housing structure by type, 2011

- **Source of Drinking Water:** In Atrai Upazila, 96.2% general household get the facility of drinking water from tube-well, 0.8% from tap and the remaining 3.0% household get water from other sources.
- **Sanitation:** In the upazila, 63.8% general household use sanitary latrine, 27.1% non-sanitary latrine and the remaining 9.1% have no toilet facility.
- **Access to Electricity:** All the 8 unions of the upazila have brought under the Rural Electrification Program. However, a total of 42.4% general household reported to have electricity connection in the entire upazila in 2011 as against 16.5% in 2001.

3.1.5 Population Characteristics: According to Population and Housing Census 2011, the total population of the upazila is 193256 of which 96129 are males and 97127 are females. The sex ratio of the upazila is 99 which has remarkably decreased in 2011 as against 104 in 2001.

- **Growth Rate:** The decadal population growth rate for the upazila is 7.48% and the annual compound growth rate is 0.71%. The decadal growth rates over the last half-century are shown table 1.1. It is seen that the growth of the upazila has started decreasing since the decade 1974-1981). The highest growth (45.3%) is found in 1961-1991 and lowest (7.5%) belongs to 2001-2011.

Table 1.1: Decadal growth rate of population, 1951-2011

Decades	Growth Rate (%)
1951-1961	26.8
1961-1974	45.3
1974-1981	24.2
1981-1991	20.3
1991-2001	7.7
2001-2011	7.5

3.1.6 Literacy and Education: Information on literacy and education is furnished below:

- **Literacy:** In Atrai Upazila, it is found that 45.4% population aged 7 years and over are literate. Literacy rates by sex of three consecutive censuses are shown in table 1.2.

Table 1.2: Literacy rate by sex, 1991-2011

Item	1991	2001	2011
Both Sex	26.8	41.8	45.4
Male	34.9	48.7	49.9
Female	18.3	34.8	41.0

Literacy rate is also shown in a Bar-Diagram in figure 1.2.

Figure 1.2: Literacy rate by sex, 1991-2011

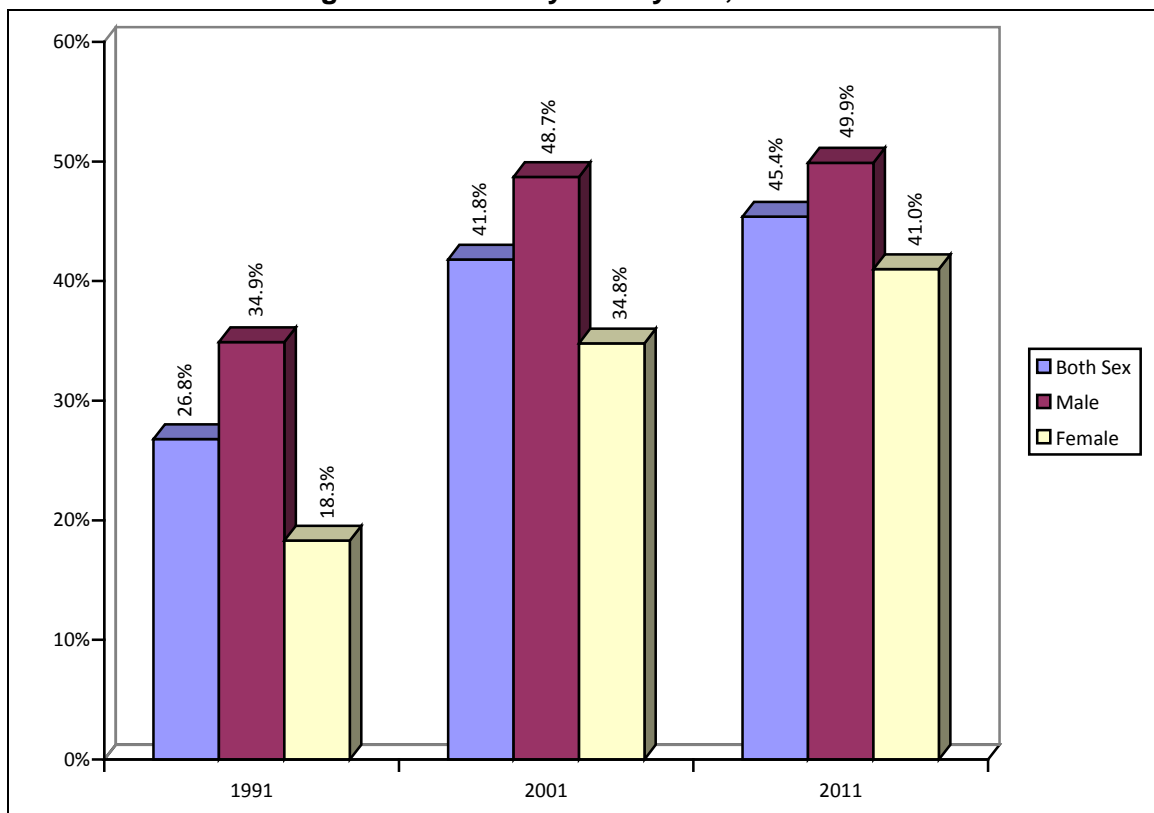

Table 1.2 shows that the literacy rate of the upazila in 2011 is 45.4% for both sex, 49.9% for male and 41.0% for female. It shows an increase of 3.6, 1.2 and 6.2 percent point in 2011 over 2001 for both sex, male and female respectively. In the upazila, the literacy is the highest i.e. 50.0% in Panchupur Union and the lowest i.e. 40.5% in Kalikapur Union.

- **Education:** School attendance of boys and girls between age 3-29 years is presented in table 1.3.

Table 1.3: School attendance rate by sex, 2011

Item	3-5 Years	6-10 Years	11-14 Years	15-19 Years	20-24 Years	25-29 Years
Both Sex	5.24	74.80	83.19	44.37	7.64	1.43
Male	5.30	73.97	80.36	48.10	13.37	2.54
Female	5.18	75.70	86.33	38.73	3.66	0.51

There exist differences in school attendance rates in different age groups which can be observed from the table 1.3. The female attendance rate in the age groups 6-10 and 11-14 years is higher than their male counterparts. On the other hand, male attendance rate in the age groups 3-5, 15-19, 20-24 and 25-29 years is higher than female. The highest school attendance rate is 86.33% which is found for female in the age group 11-14 years.

3.2.1 Background: Badalgachhi, the smallest upazila of Naogaon zila in respect of area, came into existence as a thana in 1807 and was upgraded to upazila in 1983. There are different opinions about the origin of the upazila name. Popular opinion is that in the ancient times there was no use of money currency in this locality. It had abundant Jujube trees which were used for manufacturing sugar. It is believed that goods from other localities were exchanged (meaning **Badal** in Bengali) with these trees (meaning **Gachh** in Bengali). The present name of the upazila is said to have been derived as **Badalgachhi** from the above words.

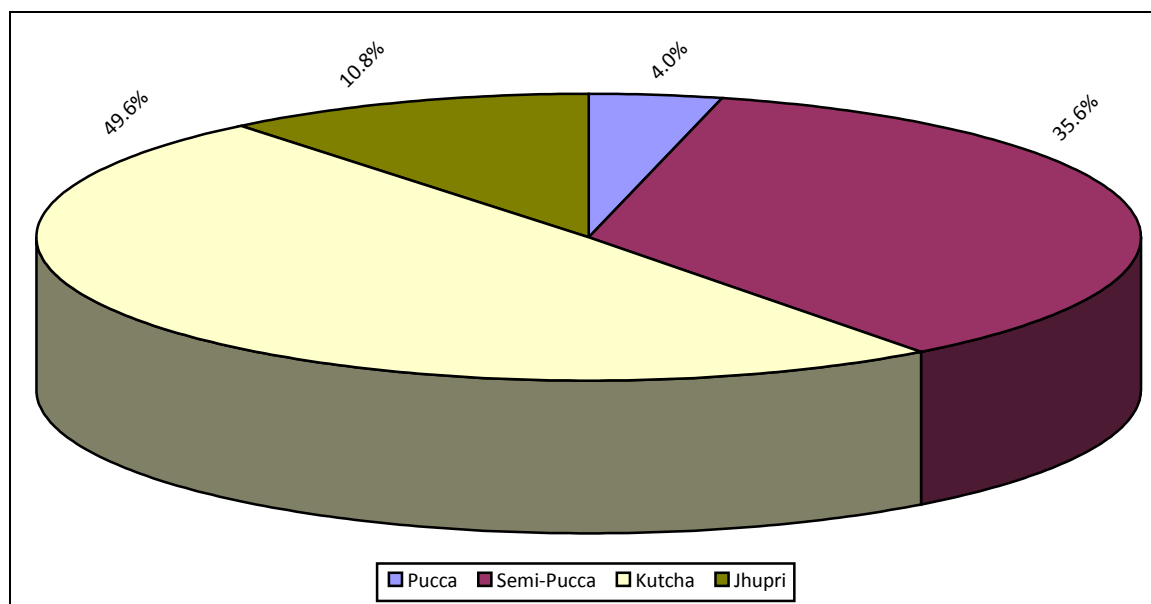

3.2.2 Area and Location: The upazila occupies an area of 213.97 sq. km. including 32.0 sq.km river area. It is located between 24°53' and 25°03' north latitudes and between 88°51' and 89°01' east longitudes. The upazila is bounded on the north by Dhamoirhat Upazila and Joypurhat Sadar Upazila, east by Akkelpur Upazila of Joypurhat Zila, south by Naogaon Sadar Upazila and west by Mahadebpur Upazila and Patnitala Upazila.

3.2.3 Administrative/Geographic Unit: The upazila consists of 8 unions, 246 populated mauzas and 238 villages. The average size of population of each union, mauza and village are 25168, 818 and 846 respectively.

3.2.4 Housing and Household Characteristics: In the upazila, there are 54001 households. Distribution of household by type shows that there are 99.94% general unit, 0.01% institutional and 0.05% other unit.

- **Household Size:** The average household size (General) for the upazila is 3.7 persons for rural and for urban areas the size is also same i.e. 3.7.
- **Type of Housing Structure:** In the upazila, 4.0% general household live in pucca house, 35.6% in semi-pucca house, 49.6% in kutcha house and the remaining 10.8% live in jhupri which is shown in a pie-chart in figure 2.1.

3.3.1 Background: Dhamoirhat Upazila came into existence in 1922 and was upgraded to upazila in 1984. Nothing is definitely known about the origin of the upazila name. It is learnt that in the past, there grew huge quantity of paddy in this area and a **hat** (weekly market) developed only for trading of this paddy. The paddy was used to be measured with a cane-made basket locally known as **Dhama**. It is generally believed that the upazila might have derived its name as Dhamoirhat from these two words **Dhama** and **hat**.

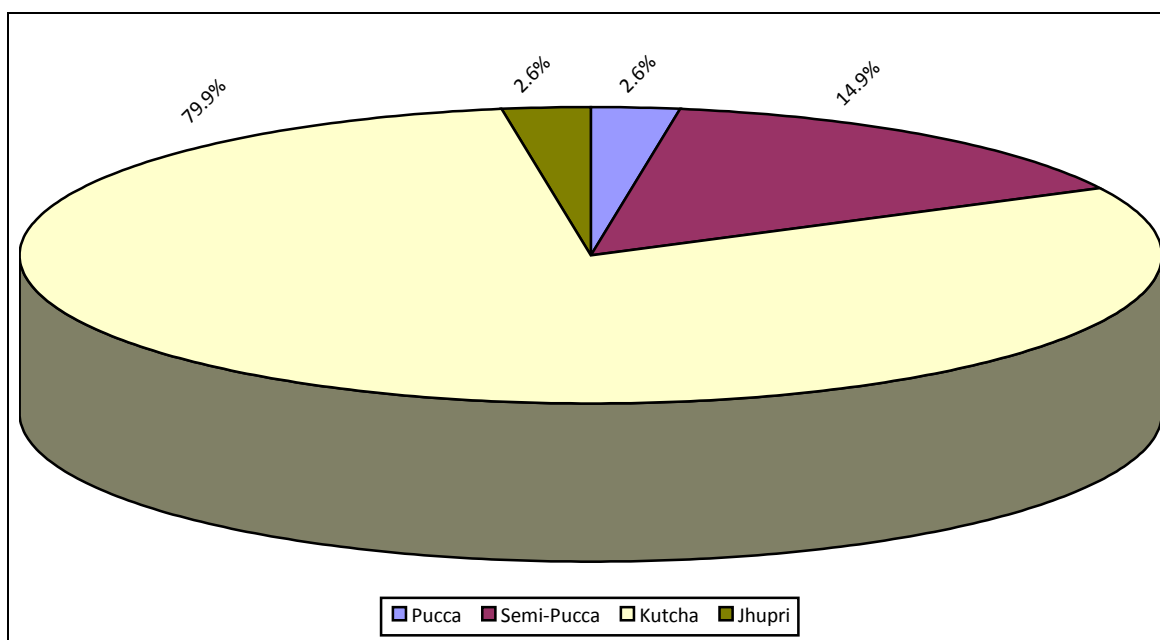

3.3.1 Area and Location: The upazila occupies an area of 300.79 sq.km. including 5.44sq.km forest area. It is located between 25⁰01' and 25⁰13' north latitudes and between 88⁰40' and 88⁰57' east longitudes. The upazila is bounded on the north by West Bengal of India, east by of Joypurhat Sadar Upazila, south by Patnitala Upazila and Badalgachhi Upazila and west by Patnitala Upazila.

3.3.3 Administrative/Geographic Unit: The upazila consists of 1 paurashava, 9 Wards, 15 mahallas, 8 unions, 205 populated mauzas and 243 villages. The average size of population of each ward and mahalla are 1667 and 1000 respectively. On the other hand, the average size of population of each union, mauza and village are 21222, 828 and 699 respectively.

3.3.4 Housing and Household Characteristics: In the upazila, there are 49046 households. Distribution of household by type shows that there are 99.90% general unit, 0.03% institutional and 0.06% other unit.

- **Household Size:** The average household size (General) for the upazila is 3.8 persons, for urban area the size is also 3.8 and for rural area the size is slightly lower i.e. 3.7.
- **Type of Housing Structure:** In the upazila, 2.6% general household live in pucca house, 14.9% in semi-pucca house, 79.9% in kutcha house and the remaining 2.6% live in jhupri which is shown in a pie-chart in figure 3.1.

3.8.1 Background: Patnitala Upazila came into existence as a thana in 1907 and was upgraded to upazila in 1984. It is the third biggest upazila of Naogaon Zila in respect of area. Nothing is definitely known about the origin of the upazila name. It is said that during the reign of Pathans, a few representatives of the Pathan king used to stay in the present area of Upazila in order to give lease (meaning *pattan* in Bangali) of different Jaigirdaries (meaning revenue circles). The name patnitala is believed to have been derived from that word *pattan*. Some others believe that many Pathan merchants settled in the present place of the upazila headquarters due to which the local people called the place as *Pathantala*. It is generally believed that the present name Patnitala is the phonetic corruption of the previous name *Pathantala*.

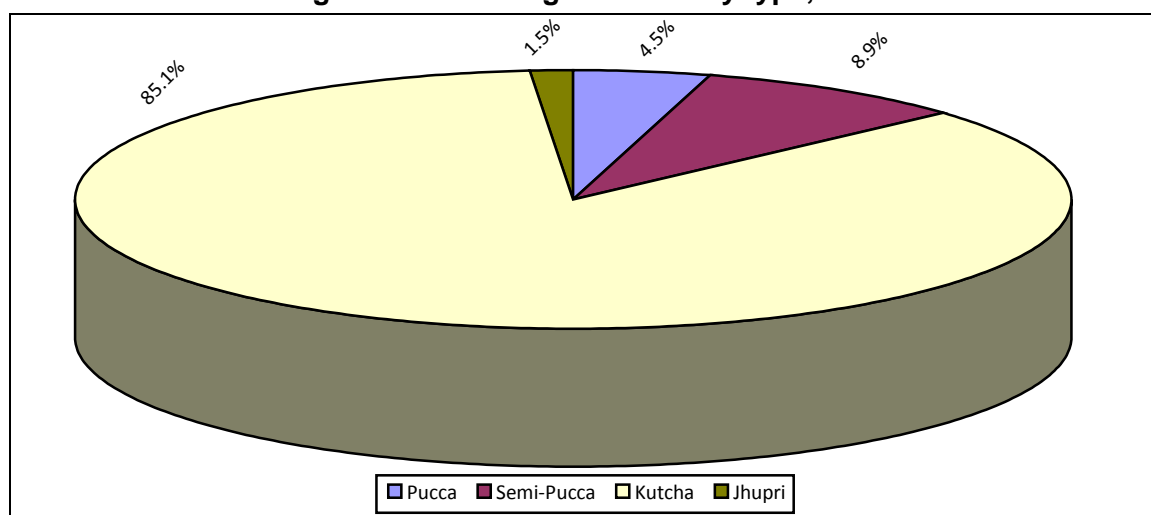

3.8.2 Area and Location: The upazila occupies an area of 382.38 sq.km. Including 1.43 sq.km river area and 14.01 sq.km forest area. It is located between 24⁰59' and 25⁰12' north latitudes and between 88⁰35' and 88⁰55' east longitudes. The upazila is bounded on the north by Dhamoirhat Upazila and West Bengal of India, east by Badalgachhi Upazila and Dhamoirhat Upazila, south by Mahadebpur Upazila and Badalgachhi Upazila and west by Sapahar Upazila and Porsha Upazila.

3.8.3 Administrative/Geographic Unit: The upazila consists of 1 paurashava, 9 Wards, 15 mahallas, 11 unions, 286 populated mauzas and 298 villages. The average size of population of each ward and mahalla are 2408 and 1445 respectively. On the other hand, the average size of population of each union, mauza and village are 19112, 735 and 705 respectively.

3.8.4 Housing and Household Characteristics: In the upazila, there are 58661 households. Distribution of household by type shows that there are 99.74% general unit, 0.03% institutional and 0.23% other unit.

- **Household Size:** The average household size (General) for the upazila is 3.9 persons. For rural area and for urban area the size is also same i.e. 3.9.
- **Type of Housing Structure:** In the upazila, 4.5% general household live in pucca house, 8.9% in semi-pucca house, 85.1% in kutcha house and the remaining 1.5% live in jhupri which is shown in a pie-chart in figure 8.1.
